REFRACTIVE MOMENTS

EXPLORING LIGHT and LIFE

MARCH 16 to APRIL 30, 2021

Refraction refers to the change in direction of a wave passing from one medium to another or from a gradual change in the medium. We are all being asked to change direction in our daily life and reinvent our routines. How can our art reflect this change in direction, by taking this moment as a positive opportunity? The exhibit showcases work in mediums other than what members usually work in or takes a preferred medium in a new direction.
